

# Advanced keg asset tracking & management

Take control of your keg inventory with KegID, the Hillebrand scanning and keg tracking solution, specifically developed for brewers.

Scan kegs and make informed business decisions using KegID's real-time data and business intelligence.

## KegID benefits

Determine true keg inventory numbers  
(*what you have vs. what you think you have*)

Increase visibility of kegs and pallets

Minimize annual keg losses

Optimize keg return cycles

Have visibility and partner accountability

Manage your empty keg inventory

Protect your asset investment

Ensure product quality by assigning  
style, batch & date

## KegID features

Keg scanning functionality

Preventive keg maintenance  
made easy

Real-time data  
and business intelligence

Quality control and  
product freshness reporting

Total keg fleet control and batch traceability

Works with Kegspediter keg management

Embeddable beer map
